
[Cable Tray Forming Machine](#)

Our cable tray forming machine is designed for producing cable trays which are ideal for cable management in commercial and industrial construction. This forming equipment is composed of decoiler, guiding device, punching die, forming system, cut-to-length device, electrical control system, etc.

Our cable tray forming machine can produce cable trays of different specifications by changing punching dies. In addition, the forming machine is adjustable, and a set of rollers can complete the production of all cable trays.

Technical Parameters of Cable Tray Forming Machine

Forming steps	18
Material thickness	0.8mm-1.5mm
Material width	300mm-800mm
Speed	(5-16) m/min
Motor power	25kw
Hydraulic cutting	7.5kw

Thanks for your interest in our cable tray forming equipment. As an experienced roll forming machine manufacturer in China, we can also produce roll shutter forming machine, sheet forming machine, tile roof forming machine, etc. Due to their reliable quality and economical prices, our products are well received by customers from Britain, France, Spain, and countries in Africa, South America.

If you have a need for our products, please contact us. We look forward to working with you.
