
Sheet Forming Machine (Corrugated Sheet)

Thanks for your visit to our website! We are specialized sheet forming machine manufacturer, located in China. This product page shows you our double layer roof forming machine, decking forming machine, corrugated sheet forming machine and curved roof forming machine, which are reliable, efficient, and CE compliant.

For detailed information regarding our products, please see below

This roof panel machine is designed to make roof panel, wall panel, roofing sheet, metal ceiling. Equipped with the computer control system, this metal roof machine is very easy to operate.

Thickness	0.3-0.8mm
Feeding width	1000-1250mm
Effective width	780-1060mm
Forming step	16
Main motor	5.5kw

Our decking forming machine features high speed, easy operation, and long service life. The products made by this equipment are aesthetic, high strength, and are extensively used in steel structure buildings like power plant, power equipment company, automobile exhibition hall, steel structure workshop, cement storehouse, steel structure office, train station, stadium, music hall, hypermarket, logistics center, etc.

Thickness	1.5-2.0mm
Feeding width	1000mm
Effective width	560mm
Forming step	28
Main motor	15kw*2

Our corrugated sheet forming machine is known for its reliable performance, great durability, and consistent quality. Corrugated sheets made by this equipment have the following advantages

1. Superior weather resistance, corrosion resistance
2. Outstanding waterproof capacity
3. Great wind resistance, quake resistance, fire resistance,
4. Good sound reduction, thermal insulation due to the use of porous foam core
5. Light weight, to reduce the load of building
6. Easy to handle and install

As a result, these corrugated sheets are widely used in the construction of modern plants, fertilizer plants, sewage treatment plants, electroplating factories, power plants, warehouse, etc.

HZ-1250-1000 Roof Forming Machine

Thickness	0.3-0.8mm
Feeding width	1000-1250mm
Effective width	780-1060mm
Forming step	16
Main Motor	5.5kw

Our curved roof forming machine primarily consists of main frame, computer control system, special cutting device, hydraulic system. Curved roof plates produced by this forming equipment are elegant, durable, economical, functional, high strength, and thus are increasingly used in the construction of plant, plane garage, gymnasium, exhibition hall, cinema, theater, etc.

Thickness	0.3-0.8mm
Feeding width	1000-1250mm
Effective width	820-1060mm
Forming step	12
Main Motor	5.5kw

If you are in need of roll shutter forming machine, tile roof forming machine, cutting slitting line, etc., we can also fulfill your needs. Our products are quality built, low priced, and are accompanied by considerate service. In addition, wearing parts are available upon request. As a result, our products are highly sought after by customers from Britain, Spain, Portugal, and countries in Africa and the Middle East, etc.

If you have any inquiries, please contact us via phone or email. Our staff is waiting to serve you.
