
[C, Z Shape Forming Machine](#)

Welcome to our website! The products shown on this page are our C shape forming machine and Z shape forming machine, which can produce different sizes of C shape purlines and Z shape purlines.

Our C, Z shape forming machine is mainly composed of uncoiler and its base, coil sheet flattening equipment, C & Z purline forming system, punching equipment, post-cutting equipment, hydraulic station, and control system.

Because C purlines and Z purlines produced by our forming equipment are aesthetic, light, fireproof, durable, high strength and easy to install, they are widely used as the purlins, wall beams, as well as roof trusses of the steel structure buildings. They can also be used to make columns, beams and arms in the machinery manufacturing industry.

Technical Parameters

C Shape Forming Machine HZ-50-300

Forming steps	12
Material thickness	2-3mm
Motor power	11kw
Cutting	hydraulic or flying saw cutting
Forming width	50mm-300mm

Technical Parameters

Z Shape Forming Machine HZ-80-300

Forming steps	12
Material thickness	2-3mm
Motor power	15kw
Cutting	hydraulic or flying saw cutting
Forming width	80mm-300mm

[C, Z Shape Forming Machine](#)

We are an experienced C, Z shape forming machine manufacturer and supplier. We provide an extensive line of products, including roll shutter forming machine, sheet forming machine, keel forming equipment, etc. As our products are quality built, long lasting and CE certified, they are well received in Britain, Spain, Portugal, and countries in Africa and the Middle East.

If you want to know more product information, please continue browsing related product pages or contact us directly. We look forward to cooperating with you.
