
[Water Drop Pipe Forming Machine](#)

Thanks for visiting our website! The product shown on this page is our water drop pipe forming machine, which adopts PLC control for ease of operation and high reliability. This forming equipment is composed of auto decoiler, guiding device, forming system, electrical control cabinet, etc. The forming speed of our forming machine achieves 10m/min, ensuring high forming efficiency.

For more information on our water drop pipe forming machine, please refer to the parameter table below

Motor power	7.5KW
Hydraulic system motor	3KW
Forming steps	20
Forming speed	10m/min
Material width	440mm
Material thickness	0.5-0.6mm

As an experienced water drop pipe forming machine manufacturer in China, we also produce roll shutter forming machine, sheet forming machine, embossed forming machine, and more, in order to satisfy customers different demands. Due to their reliable quality and competitive prices, our roll forming machines are very popular in Britain, France, Spain, Portugal, and countries in Africa and South America, etc.

We look forward to working with more customers worldwide.
